

Job description

We are most passionate about one thing: people. Believing in the greatness and radiant light in every person, our greatest desire for Radiant Autism Center is to be a place for kiddos diagnosed with ASD to thrive and families to feel supported. The journey began in early 2020, when we recognized the need for ABA therapy in North DFW. Since then, we've grown alongside amazing families and the best team of clinicians in the industry. Our community is supportive, fun, and uplifting. Together, we are part of something much greater than we could ever do alone! We are seeking fun people who live in alignment with our values, and who want to be part of something bigger than themselves.

Responsibilities

- Provide a fun and positive atmosphere for our kiddos to learn and grow
- Completing initial and re-evaluations and reports.
- Provide consultation directly with behavior therapists and other clinicians; conduct a review of data and assessment materials; provide clinical input and feedback as part of a multidisciplinary collaborative team with other clinicians and staff.
- Providing direct services to patients by implementing all programs and BIPs developed and/or approved
- Manage a full client caseload
- Meet with families and caregivers frequently to provide training and updates on client progress
- Meeting as needed with direct supervisors and completing the required paperwork and associated billing log daily as well as requirements by the BACB.
- Conduct assessments, reassessments and write assessment reports, BIPS, goals, targets and other applicable clinical assignments
- Develop programming, interventions and other ABA applicable interventions for patients on an ongoing basis

- Complete and maintain credentialing, CAQH, NPI and other applicable forms
- Provide supervision for RBTs and BACB supervision students as assigned and following the BACB requirements. Effectively lead RBTs through implementation of BIPs, and monitor treatment fidelity
